

TimeCamp

Boost effectiveness

Increase self-discipline

Gain extra time

Automatic time tracking software for business

Do you know....

...that 20 minutes a day spent on Facebook during working-hours equal two weeks of additional leave a year?

... where your time goes while working all day in front of the computer screen?

...that on average employees declare to spend over 1 hour a day on browsing non-work related websites?

What is TimeCamp?

TimeCamp is a software developed to monitor and optimize work efficiency on the computer. System does not affect the user's private sphere, however is very effective at increasing productivity by raising the level of self-discipline.

Why now?

Access to the Internet on each company computer results in too much time wasted on browsing non work-related websites. A company with 1,000 Internet users could lose upwards of \$35 million in productivity annually from just an hour of daily Web surfing by employees. TimeCamp can reduce the bulk of this loss. The system does not restrict access to the Internet, but helps employees use it effectively to perform their professional duties.

TimeCamp – monthly overview

How does TimeCamp work?

Activity registration

TimeCamp measures time spent on used applications and active web browser tabs. System does not record programs running in the background or web pages that are not currently browsed. Application stops counting the time when user leaves the desk.

Categorization of activities

Based on defined criteria system categorizes behavior as either productive or private and not related to professional duties. TimeCamp also calculates what percentage of time was spent on work related activities.

Reporting tools for employees and managers

Each employee gets access to individual dashboard which reports the effectiveness of time spent at work. The reports clearly show how much time was dedicated to professional duties and how much was stolen by unproductive "time thieves". Activities marked red on the graph indicate counterproductive websites and applications use of which should be eliminated or at least limited.

Managerial dashboard

Executives have the ability to check productivity of their teams, departments or entire company. The employees have only access to average figures so they can compare their results with entire group. This is a great feature that motivates every user to increase their effectiveness.

Automatic time attendance registry

TimeCamp offers many other functions, such as automatic time attendance recording. Owing to this feature you will always know what time users turn on and off work stations which usually equals the beginning and end of work.

What can you benefit from TimeCamp?

1. Increased employee effectiveness

TimeCamp automatically calculates total time dedicated to professional duties and private activities as well. System makes employees realize, how much time they waste and motivates them to effective work. From supervisor's point of view, single glance is enough to find out who honestly works.

2. Higher level of self-discipline

TimeCamp acts as an extra manager that motivates each employee to perform delegated tasks. Employees are more focused and avoid using applications and websites distracting their attention. The users monitor themselves!

3. Identify and eliminate "time thieves"

System makes employees realize the large scale of loss caused in longer periods by few minutes devoted to private matters each day. Owing to this information users at least limit or entirely eliminate form their behavior activities stealing their precious time.

4. Reduced network load, higher savings

Limited use of social networking sites and other entertainment services at work noticeably reduces the load of corporate network and demand for additional bandwidth. This increases work comfort while reducing cost of infrastructure maintenance.

5. More rational software purchases

TimeCamp clearly shows what software is most frequently used by users and identifies applications that are used occasionally. This is valuable information for Head of IT allowing optimally decide what licenses should be renewed and what should not.
